3. CREATE YOUR PRESERVATION FUND

We offer a wide range of investment options. You or your financial intermediary may structure your portfolio according to your individual risk profile. You may invest a lump sum and you may choose whether to phase in a portion of that amount

Components

As a result of the Two-components retirement system you could potentially have up to three different components within your one investment. The following components may be applicable:

You may have multiple components within your investment.

Retirement component

The purpose of this component is to save for your retirement. You may therefore not withdraw from this component before retirement, subject to exceptions, as per legislation.

Savings component

This component provides you with the option to access a portion of your retirement savings before retirement. You may therefore withdraw from this component once every tax year, subject to conditions.

Vested component

In accordance with the law, if this investment is funded by a provident or provident preservation fund it will have vested or non-vested rights, or both. This will have an impact on the options available at retirement.

This component will consist of existing vested and non-vested portions, if applicable, and will retain their rules.

3.1 Lump sum investment

As a result of the Two-pot retirement system you could potentially have up to three different components within your one investment. The following components may be applicable:

A lump sum investment is a once-off investment and it includes any amount you may want to phase in.

Lump sum

If you are only investing a lump sum, the minimum amount is R30 000.

How much would you like to invest?

R

The transferring provider will provide us with a Recognition of Transfer (ROT) and we will allocate the investment amount to the different components accordingly.

Choose your investment options

Glacier offers you several investment options. You can choose collective investments, wrap funds or a share portfolio. Your financial intermediary will be able to give you more details on these investment options.

Regulation 28

Regulation 28 of the Pension Funds Act limits exposure to the various asset classes in which you can invest your preretirement savings. Regulation 28 prescribes that the Fund, and therefore each member, must comply with the maximum asset class exposure limits. Amongst others, the following maximum exposures are applicable: 75% equity, 15% private equity, 25% property,10% hedge funds, etc. The total asset class exposure is further limited to 45% in direct infrastructure and 45% in foreign assets (outside of South Africa).

Regulation 28 will be applied and monitored. Should you exceed these limits, the Fund may switch your investment to the AF Banker.

How to complete this table

If you are transferring units to this investment and you want these units to remain invested as they are, the list in the table below must exclude the units being transferred. The portion of your lump sum amount that is the unit transfer will then not form part of the investment allocations below.
