Inflation figures lagged by one month

* Reasonable use of the survey may be made for purposes of comment and study provided that full acknowledgement is made to "Alexander Forbes Research & Product Development".

* While all possible care is taken in the compilation of the Survey, reliance is placed on information received from Investment Managers. * The rankings and statistical information have been supplied for illustrative purposes only.

* Performance figures are shown gross of fees.

* Performance should not be judged over a short period of time. * Past performance is not necessarily a guide to future performance.

Objective - The portfolios in this Survey comply with Regulation 28 and represent products targeted at real returns with a CPI Objective

Benchmark Methodology CPI - Due to the reweighting and rebasing of the CPI from January 2009 the benchmark numbers reflect a compound of month to month CPI returns. The historical month to month numbers used in calculations are the official month to month numbers based on the old basket prior to January 2009 and new basket post January 2009. The adjusted CPI(I-Net code: AECPI) figures are shown together with market statistics below should these numbers be preferred for comparison purposes.

Enchangek Methodology CPIX: The benchmark numbers prior to January 2009 relacted a compound of month to month CPIX for terms. Due to the reweighting and rebasing of the CPI and discarding of the CPIX. numbers from January 2009 the Institutial month is orthor unbers are the difficial month to month numbers are the difficial months based on the difficial month numbers are the difficial months are unbers based on the difficial months are unbers and the difficult baseles post January 2009. The CPI workshow the term of the difficult baseles post January 2009. The CPI workshow the term of the difficult baseles post January 2009. The CPI workshow and adjusted CPI(I-Net code: AECPI) figures are shown together with market statistics below should these numbers be preferred for comparison purposes.

* Performance figures are shown gross of fees. * Performance should not be judged over a short period of time.

Objective - The portfolios in this Survey comply with Regulation 28 and represent products targeted at real returns.

Benchmark Methodology CPI - Due to the reweighting and rebasing of the CPI from January 2009 the benchmark numbers reflect a compound of month to month CPI returns. The historical month to month numbers used in calculations are the official month to month numbers based on the old basket prior to January 2009 and new basket post January 2009. The adjusted CPI(I-Net code: AECPI) figures are shown together with market statistics below should these numbers be preferred for comparison purposes.

Benchmark Methodology CPIX - The benchmark numbers prior to January 2009 reflected a compound of month to month CPIX returns. Due to the reweighting and rebasing of the CPI and discarding of the CPIX numbers from January 2009 the historical month to month numbers used in calculations are the official month to month numbers based on the old CPIX prior to January 2009 and the new CPI basket post January 2009. The CPI excluding owners equivalent rent (I-Net code: AECPIX) and adjusted CPI(I-Net code: AECPI) figures are shown together with market statistics below should these numbers be preferred for comparison purposes.

* Reasonable use of the survey may be made for purposes of comment and study provided that full acknowledgement is made to "Alexander Forbes Research & Product Development".

* While all possible care is taken in the compilation of the Survey, reliance is placed on information received from Investment Managers. * The rankings and statistical information have been supplied for illustrative purposes only.

* Performance figures are shown gross of fees.

* Performance should not be judged over a short period of time. * Past performance is not necessarily a guide to future performance.

Objective - The portfolios in this Survey comply with Regulation 28 and represent products targeted at real returns with a CPI Objective.

Benchmark Methodology CPI - Due to the reweighting and rebasing of the CPI from January 2009 the benchmark numbers reflect a compound of month to month tCPI returns. The historical month to month numbers used in calculations are the official month to month numbers based on the old basket prior to January 2009 and new basket post January 2009. The adjusted CPI(I-Net code: AECPI) figures are shown together with market statistics below should these numbers be preferred for comparison purposes.

Benchmark Methodology CPIX- The benchmark numbers prior to January 2009 reflected a compound of month to month CPIX returns. Due to the reweighting and rebasing of the CPI and discarding of the CPIX numbers from January 2009 the historical month to month numbers used in calculations are the official month to month numbers based on the old CPIX prior to January 2009 and the new CPI basket post January 2009. The CPI excluding owners equivalent rent (I-Net code: AECPIX) and adjusted CPI(I-Net code: AECPI) figures are shown together with market statistics below should these numbers be preferred for comparison purposes.

correctness of this information.

General :

Managers are ranked from highest to lowest active return. In some cases rankings may be different due to return differences disguised by the rounding. Rankings are purely for illustrative purposes

GIPS[™] is a trademark owned by the CFA Institute.

<u>Statistical Definitions :</u> The Median is the value above or below which half the managers fall. The Upper Quartile is the value above which one quarter of the managers fall. The Lower Quartile is the value below which one quarter of the managers fall.

Risk Anlysis Definitions :

"Volatility" is the annualised standard deviation of the manager's monthly returns. "Volatility" is a measure of the variability of the manager's returns.

"Return to Risk" is the return divided by the "Volatility" "Return to Risk" is a measure of the return earned per unit of risk taken.

"Active return" is the return earned by the manager less the return on the benchmark.

"Active Return" is a measure of the value that the manager has added or detracted over the benchmark return.

"Tracking Error" is the annualised standard deviation of the monthly "Active Returns".

"Information Ratio" is the "Active Return" divided by the "Tracking Error".

"Information Ratio" is a measure of the value added per unit of risk taken relative to the benchmark.

Sortino Ratio (Capital Loss) measures whether the return in excess of a zero benchmark was sufficient to cover the downside volatility/risk inherent in the investment ie whether capital was indeed preserved.

"Sortino Ratio (Inflation)" measures whether the return in excess of a inflationary benchmark was sufficient to cover the downside volatility/risk inherent in the investment ie whether capital was protected in real terms.
