SHARI'AH MANAGER WATCH™ SURVEY

EXPLANATORY NOTES

The portfolios reflected in this survey comply with Shari'ah guidelines that govern Islamic Investment funds.

The general principles of Islamic Investments are:

- * The investment must comply with Shari'ah principles that govern Islamic investment funds and that prohibit investment in companies whose primary business is not consistent with Shari'ah principles;
- * Securities that do not meet specified financial parameters are excluded. This would include limits on interest bearing debt, interest earning assets or any other form of non-permissible income;
- * The fund manager conducts a purification process on the non-permissible income generated. The non-permissible income is usually donated to charity.

Glossary and Abbreviations:

AAOIFI - Accounting and Auditing Organisation for Islamic Financial Institutions.	GCIBF - General Council for Islamic Banks and Financial Institutions.
IAIE - International Association for Islamic Economics.	IFSB - Islamic Financial Services Board.
Halal refers to something that is permissible according to Islamic law. To be considered acceptable, a business transaction must be based on an Islamic contract form, distribute risk and return among the parties to the contract, and avoid unacceptable activities, including interest and uncertainty. To determine whether a stock is halal, Muslim investors evaluate companies based on levels of debt, interest income, and liquidity, as well as participation in prohibited activities.	Haram describes anything that is unacceptable under Shariah law. It is considered inappropriate for a Muslim investor to profit from any activity that violates Islamic principles. Certain industries, including alcohol, pornography, gambling, pork, and conventional financial services, are inherently haram.
Murabahah refers to an installment credit agreement for the sale of tangible goods. The seller acquires an asset, which the buyer agrees to purchase at some point in the future. The seller is entitled to a profit, as long as the exact markup is disclosed in the contract. Payments may be spread out over time.	Purification refers to getting rid of unacceptable profits. Shariah prohibits Muslims from profiting, even indirectly, from unacceptable practices, so investors are expected to account for and give away any income derived from riba or other haram sources.
Shariah is the divine law of Islam, derived from the Qur'an and other holy texts, which serves as a moral guide to Muslims. The Shariah sets guidelines for what is right and wrong in everyday life, including standards for food, family life, and business transactions.	Sukuk are asset-backed securities designed to provide a relatively fixed stream of investment income without violating the Islamic prohibition on interest. Instead of interest payments, sukuk investors receive a pass-through of income generated by the underlying assets. Sukuk are a Shariah-compliant tool for raising capital and may be structured around a variety of Islamic contracts.

General Disclaimers :

The information contained herein is supplied on an "as is" basis and has not been compiled to meet any third party's individual requirements. It is the responsibility of any third party to satisfy himself or herself, prior to relying on this information that the content meets the third party's individual requirements.

Nothing in this document, when read in isolation and without professional advice, should be construed as solicitation, offer, advice, recommendation, or any other enticement to acquire or dispose of any financial product, advice or investment, or to engage in any financial transaction or investment. A third party should consult with an authorised financial advisor prior to making any financial decisions.
